This filing and the accompanying amended filing of Environment America Action Fund's 2012 post-election report are made in response to questions raised in the Marc h 14, 2013 Request for Additional Information issued to Environment America Action Fund.

With regard to your first inquiry, inquiring as to the office sought information listed on Independent Expenditures supporting Timothy Michael Kane, Amerish Bera, Lois Capps, and Daniel Benjamin Maffei: We have discovered inadvertent errors in the listings of offices sought, and have corrected them in the amended report.

With regard to your second inquiry, inquiring as to the 24 Hour Report filed on October 25, 2012, which listed six expenditures dated October 18, 2012, this appears to have been due to an error with the filing system. That 24 Hour Report is a copy of the October 19, 2012 24 Hour Report, which was inadvertently filed a second time. The expenses listed on that report were made only once, but, due to a technical error which we have not been able to identify, were reported in 24 Hour Reports on both October 19, 2012 and October 25, 2012. These expenses are reported only once on the post-election report, which is correct, because the expenses themselves occurred only once.

With regard to your third inquiry, inquiring as to independent expenditures on behalf of Elizabeth Warren, Timothy Michael Kaine, and Barack Obama which were marked as being for primary contests, but which were made subsequent to the primary dates in those candidates' respective races: Those expenditures were in fact in support of those candidates in the general election. The checking of the "primary" box rather than the "general" box was an inadvertent error on our part, and has been corrected in our amended post-election report.

With regard to your inquiry (unnumbered), regarding Schedule B disclosures of disbursements listed as "to purchase ads in FL-2 for Al Lawson" supporting Al Lawson and "to purchase ads" supporting Scott Peters, Betty Sutton and Pete Gallego: The amounts listed were contributions made to the House Majority PAC. Environment America Action Fund did not purchase ads but instead made a contribution to House Majority PAC. It is our understanding that among other activities, House Majority PAC purchased ads in congressional districts. EAAF, however, did not have a role in selecting districts or purchasing the ads. Therefore the report is corrected to show this disbursement as a contribution.

With regard to your final inquiry, regarding a disclosure of an operating expenditure under Schedule H4: We have examined the report and determined that the operating expenditure listed in Schedule H4, a bank fee of \$125 paid to Sun Trust Bank on 10/31/12, should not have been reported on that Schedule. Because this operating expense is under \$200, it should not have been itemized. This error has been corrected in our amended post-election report. During the course of our review in response to your Request for Additional Information, we discovered one additional error-a contribution of \$3500, received on November 6, 2013, which we reported as being from Credo Super PAC was in fact a contribution from Progressive USA Voters. This contribution was misidentified due to a data entry error, and has been corrected in our amended post-election report.
